Meeting Purpose
The 2017 Rio Grande / Rio Bravo Binational Forum will bring together a variety of water users, such as farmers, ranchers, city officials, tribal members, policymakers, business leaders, conservationists, and scientists from Mexico and the United States. Together, we will share creative approaches to meet river management and water challenges, inspire collaboration, and highlight and build upon successes to protect the river for future generations.

Desired Outcomes
- Share solutions, innovations, and tools to solve problems in the river basin.
- Inspire attendees to feel positively about the basin and its future.
- Connect to others and build relationships.
- Begin to create a common vision for where to go after the Forum.
